Sysmark
LIMITED
Specialty in Healthcare Fields

Our Vision

To Design, Source & Deliver The Most Innovative & Trustworthy Products & Solutions

The vision of Sysmark Ltd. is to become a diversified, leading supplier in the healthcare industry countrywide, by designing & delivering the most innovative specialty products in the healthcare field that it is active in.

At Sysmark we wish to develop our organization into a synonym of quality healthcare and become the optimum supplier of innovative specialty products and services in every market segment we are involved in, at country level. We wish to meet countrywide expectations for access to fast, innovative and cost effective healthcare. Additionally, through our activities we are keen to offering as many career opportunities as possible and become an employer of choice.

Finally, we understand that healthcare is "all about giving" and throughout our social activities, we are committed "to give back to the local community".

Our Mission

To Improve the Lives of Millions

Following closely our philosophy that is based on the key principles of Innovation, Quality and Service, our mission is to offer to healthcare professionals, as well as the wider public across the country, innovative solutions for their daily healthcare needs.

Sysmark is present in a wide array of healthcare industry business segments and therefore aims to apply continuous development, to design, source and offer optimum solutions, whether it is a specialty product or a service, in healthcare fields.

Our Philosophy

Quality, Innovation & Service

Our philosophy is one that captures the combination of end-users' needs with healthcare professionals' innovation & design.

Our philosophy incorporates the aspects of Quality, Innovation, Service combined with continuous change & adaptability as well as fast response & creative flexibility which are all key elements towards achieving the desired outcome.

Therefore, Sysmark Limited can perceive the significance of novice products and technologies which will create an instant demand among the country people as well as will add enormous value in the quality of Health Care Sector. Its management is consisted with some highly qualified persons who have long-term working experiences with leading healthcare institutes. At the same time, it has advanced medical professionals and sufficient experienced and highly trained sales & marketing personnel to inaugurate new technology nationwide. It strongly believes that it will materialize this lofty desire to make a difference around the country for the betterment of massive people with innovation.

Specialty in Healthcare Fields

Sysmark Limited has been established in 2016 by a group of leading professionals with lengthy experience in the wider healthcare sector and a vision to provide the most innovative & trustworthy solutions in the market, aiming to become the market leader in the healthcare industry.

At its initial steps, the company collaborated closely with renowned manufacturers of the international medical device industry in order to distribute their products and introduce their technologies in markets that lacked the appropriate know-how, efficient logistics & supply chain.

Sysmark is a people-centric organization that is "made from people to serve other people". Sysmark continuously invests in human capital, which is the core of the organization. Our employees' knowledge, hard work, accountability and passion for healthcare are the key elements that qualify our organization to be a "premium specialty healthcare supplier" of innovative products and solutions. Our entire organization is dedicated to health as the willingness to give back to society is the one that characterizes Sysmark.
